**WHEN**

Monday, February 25, 2019  
6:00 PM | Reception  
6:45 PM | Program

**TICKETS**

\$10 Members  
\$20 Nonmembers

**WHERE**

Asia Society Texas Center  
1370 Southmore Boulevard  
Houston, Texas 77004

## Trilateral Japan, U.S., and Israel Advancements in Artificial Intelligence for the Aging and Healthcare: A Dialogue with Industry and Academic Experts

*In collaboration with AJC, Cole Chemical, the Consulate General of Israel in Houston, the Japan Foundation Center for Global Partnership (CGP), the Japan External Trade Organization (JETRO), the Ministry of Foreign Affairs of Japan, and the U.S.-Japan Council*

Incredible changes underway in the medtech industry will shape the future of healthcare and aging populations. As Artificial Intelligence (AI) continues to unlock new possibilities for safety and efficiency, what societal impacts can we expect? What problems may arise, and what solutions should we begin to develop?

Join us for a panel discussion on the pioneer nations in medtech — Japan, the United States, and Israel. Our expert speakers will address areas of trilateral cooperation, as well as major innovations on the horizon.

Attendees will also get to meet PARO, an interactive robot developed for patients and seniors by National Institute of Advanced Industrial Science and Technology (AIST).
